## TWMA – OTC

Leading international environmental services specialist Total Waste Management Alliance (TWMA) will exhibit at OTC 2009 in Houston for the third consecutive year, underlining the company's commitment to building its presence in important international oil and gas markets.

TWMA directors Ronnie and Davie Garrick will head up the five-strong team, alongside key new appointment Ralph John – senior vice president (business development) of the Middle East region, US-based Ian Nicolson – vice president (business development) of Americas and Jess Parker – business development associate.

Managing director Ronnie Garrick said: "Our stand at this year's exhibition will provide an ideal platform to showcase our package of integrated environmental services to the US market.

"We recently moved into our new global headquarters in Aberdeen and restructured our operations to help us better serve growing demand from our customers around the world so it is vital for us to communicate clearly to our existing and potential customers who we are and what we do."

Mr Garrick added: "Our mobile drill cuttings processing unit – the TCC-RotoTruck – can go virtually anywhere in the world to treat, handle and recycle the by-products of the drilling process and has attracted a great deal of interest in the US. OTC gives us the opportunity to showcase the technology along with our full range of products and services."

As well as bases in Aberdeen and Houston, TWMA has additional operations in the UK at Peterhead and Shetland and internationally in Egypt, Nigeria, Norway, Dubai, Libya and Kuala Lumpur.
